

# Y A Y A

If it were up to us we would leave this space blank and let our designs do the talking. We don't feel like bragging about ourselves or bore you with how we first started this company in 1992 by selling basics. Our passion for travelling, trading and creating turned into YAYA where it is today. A fashion and home brand for those who like to dress up casually. Common sense, great quality and desirable, but accessible design are key values to describe YAYA.

YAYA is not a person. It's not an age. It's not even just a great design. It's a state of mind.

And in case you really wonder. YAYA is sold worldwide at over 2500 selling points. You can find around 20 YAYA brand stores in 5 countries. Our main office is situated in a tiny village near Amsterdam where we try to make great things happen.

## WANTED: (IT OR DIGITAL) PROJECT MANAGER

FULLTIME

### Role Overview:

We are looking for an experienced, passionate (IT or Digital) Project Manager to join our team. This person will be required to understand our legacy systems, our business objectives and to manage the delivery of interdisciplinary solutions, covering both established and cutting-edge technologies. We are growing and our new project manager will be comfortable working in a collaborative team, not afraid to suggest ideas and love to take on a diverse range of projects (e.g. hardware, software, content creation, marketing and more). Data science is at the core of our business and will therefore play a key role in every project undertaken. This role will report directly to the CTO.

### Key Responsibilities:

- Responsible for the end-to-end delivery of multiple projects; from architecture definition, functional analysis, design, build, testing and maintenance. You are capable of understanding complex IT systems and becoming a source of knowledge to the wider team.
- You will be the interface between the key stakeholders and team members and ensure the timely and efficient delivery of the projects.
- You will skillfully execute scope definition, RAID (Risks, Assumptions, Issues & Dependencies), budget, resource and time management.
- You will establish clear communication channels, test plans and project documentation. Some projects will require external supplier involvement, so you should be comfortable handling both internal and external resources/partners.
- Agile experience is a must and you will be tasked with establishing the appropriate processes to support this.

### About you:

- 5+ years' experience in a digital or technical project management role.
- Experience using Jira, Phabricator or similar.
- Experience with Office products.
- Comfortable leading meetings and presenting.
- Experience with CMS, CRM, API and other standard web technologies.
- Agile experience a must.
- Experience in eCommerce and/or logistics is preferred.
- Project Management accredited.
- Highly analytical, organised, strong attention to detail and a problem solver.
- Proactive, positive and flexible with a 'can do' attitude.
- Excellent written and verbal communication skills.
- Fluent in both written and spoken English & Dutch.

### You get:

We offer a competitive salary plus benefits.  
Workbase is YAYA HQ in Halfweg

### INTERESTED?
